EFFICIENT AND SAFE

Maximum DC Charging Power of 240 kW

A large battery, equipped with an efficient and safe battery management system, provides a long electric driving range. It also supports fast charging, maximum of 240 kW, allowing the battery to go from 30% to 80% within 15 minutes.

Electric Trunk Glass Roof, Rear Window and Tailgate

Experience a new level of convenience with a trunk glass roof, rear window and tailgate that can be opened and closed independently, offering maximum flexibility for storing belongings, family trips or outdoor activities.

Front Zero Gravity Seats

Experience superior comfort with front seats offering 14-way electric adjustment and a ventilation system, ensuring perfect support for every posture throughout the journey.

Air Suspension and Continuous Damping Control (CDC)

A suspension system with adjustable height and damping, designed to adapt to every driving need. Raise the height for better visibility and safety on rough terrains, lower it and increase damping for high-speed stability, or soften it to enhance driving comfort.

ADVANCED INTELLIGENCE

Scenario Mode and Sentry Mode

Enjoy various scenario modes such as Nap Mode and Camping Mode, which adjust the cabin space and create the perfect ambiance. Additionally, Sentry Mode monitors the surroundings and records videos to track suspicious activities or threats when the vehicle is unattended.

Integrated Adaptive Cruise Control (IACC) and Auto Parking Assist (APA)

IACC helps maintain a safe distance from the vehicle ahead and keeps the vehicle centered in its lane, reducing fatigue during long drives. Additionally, APA enables smooth and precise parking, even in tight spaces, making parking effortless and adding convenience to your everyday life.
